C12-116 - Community Partners

Project Narrative

Gorman Lake has elevated nutrient levels and drains into the Cannon River. This project will provide a subgrant to the Gorman Lake Association to install a two-tiered retention pond to reduce both phosphorus and peak flow from a drainage ditch from reaching Gorman Lake.

Project partners include three agricultural producers, the Le Sueur Soil and Water Conservation District and the Natural Resources Conservation Service.

Proposed Outcomes:

Project Outputs:
Two-tiered sediment/water retention basin

Actual Outcomes:

Project in Progress

Gorman Lake Water Retention Basins

Gorman Lake Retention Ponds Community Partners
