C12-84 - Accelerated Implementation

## Project Narrative

The Lac qui Parle River suffers from low dissolved oxygen and high bacteria levels. Lac qui Parle County recognizes the need for a Level 3 Feedlot Inventory to use as a tool for targeting outreach efforts and financial assistance to improve the river and protect other unimpaired surface waters of the County. This project will allow the county to hire a temporary part time staff person to complete a Level 3 Feedlot Inventory.

### Proposed Outcomes:

New staff to complete Lac qui Parle County Level 3 Feedlot Inventory including a workshop introducing the project to livestock producers within the county.

### Actual Outcomes:

Project in Progress
