C12-255 - Accelerated Implementation

Project Narrative

This project will inventory and conduct compliance inspections on Subsurface Treatment Systems (SSTS) around eight lakes in Todd County. Lakes to be inventoried include Big Sauk Lake, Big Swan Lake, Little Osakis Lake, Fairy Lake, Lily Lake, Long Lake, Little Birch Lake and Moose Lake. Approximately 1,200 parcels will receive compliance inspections. Systems that fail to meet standards will be brought into compliance using procedures available in rule and ordinance.

This is the second round of lake SSTS inspections that have been conducted in Todd County. This is a collaborative effort between the Todd County Division of Soil, Water Conservation and Development, the Sauk River Watershed District in cooperation with lake associations. Todd County will provide logistical support, oversight and fiscal management of the project.

Proposed Outcomes:

- Big Sauk Lake - Todd County; Septic System Inventory and upgraded septic systems
- Big Swan Lake - Todd County; Septic System Inventory and upgraded septic systems
- Little Osakis Lake-Todd County; Septic System Inventory and upgraded septic systems
- Fairy Lake, Lily Lake and Long Lake-Todd County; Septic System Inventory and upgraded septic systems.
- Little Birch Lake and Moose Lake - Todd County; Septic System Inventory and upgraded septic systems

Actual Outcomes:
