C12-151 - Community Partners

Project Narrative

As the City of Wadena is being re-built after an EF4 tornado, it has become evident that more needs to be done to reduce runoff by retaining or diverting stormwater. The purpose of this project is to provide subgrants to citizens to install various conservation practices on their properties including grassed waterways, rain gardens and tree plantings. Through this subgrant program the citizens of Wadena will have a greater understanding of the importance of stormwater management.

Proposed Outcomes:

Project Outputs:

- Rain Barrels
- Rain Gardens
- Grassed Waterway/Swale
- Tree Plantings
- Education and Outreach

Actual Outcomes:

Project in Progress
