

Accelerated Feedlot Technical Assistance

Clean Water Funds: 2013

Clean Water Grant	\$333,120
Leveraged Funds*	\$83,280
Total Project Budget	\$416,400

* Leveraged Funds include required 25% local match

Project Sponsor:

SE SWCD Technical Support JPB

Grant Period:

January 2013—December 2015

Project Contact:

Glen Roberson

- AcceleratCWF13-62ed Implementation

Project Narrative

This project will extend two Feedlot Technical positions initially created and funded by a FY2011 CWF Feedlot Water Quality Grant that assess and help fix animal waste runoff from small feedlots. The technicians will work with and under the Technical Authority and priorities of the South East Soil and Water Conservation District Tech Support JPB lead Engineer. This project will enable more projects to be constructed resulting in a reduction of nitrogen, phosphorus and fecal coliform runoff into surface and ground water in South East Minnesota and the Mississippi River.

Proposed Outcomes:

Two feedlot technicians that will enable more livestock operations to come into compliance and stay in operation.

Actual Outcomes:

Project in Progress
