Leveraged Funds*	\$13,752
Total Project Budget	\$68,487

* Leveraged Funds include required 25% local match

Project Sponsor:

Douglas Soil and Water

Grant Period:

January 2013—December 2015

Project Contact:

Jerome Haggemiller

- CommCWF13-222unity Partners

Project Narrative

The Partners for Clean Water program will enable community groups to take action to improve their water resources. Engaging citizens directly in project development and installation efforts provides immediate water quality benefits and develops a community of active stewardship. Installation of projects previously developed by Douglas County community groups will shift the currently dormant water quality protection efforts.

The Douglas Soil and Water Conservation District will

partner with community groups such as Lake Associations and Sportsmen’s Groups to publicize, design, and install conservation practices to improve the waters in Douglas County. This process will include community engagement steps of soliciting projects, hosting project installation open houses, and reporting to the group the projects results and final costs. Group members will be encouraged to propose additional BMP projects and engaged in an active critique of other proposed BMPS in their area of interest.

Proposed Outcomes:

Five Community Partners Grant Projects

Actual Outcomes:

Project in Progress
