

Swan River Headwaters Clean Water Fund

Clean Water Funds: 2011

Clean Water Grant	\$203,158
Leveraged Funds*	\$50,789
Total Project Budget	\$253,947

* Leveraged Funds include required 25% local match

Targeted Water:

County/Watershed Wide

Project Sponsor:

Todd SWCD

Partners:

Landowners

Grant Period:

January 2011 - December 2012

Project Contact:

Amy Piekarski
320-732-2644 3
amy.piekarski@co.todd.mn.us

Project Narrative

Residents in the Swan River Watershed have become increasingly concerned with their surface water quality. In an effort to reduce excess sediments and pollutants from entering surface waters, the Todd Soil and Water Conservation District will be identifying land owners in priority areas and working with them to install best management practices on lakeshore properties and feedlots within the watershed.

Planned projects include: shoreland stabilization and restoration, river and lake bank stabilization, storm water controls, native plantings and livestock waste management projects. Construction work on these projects will begin in the Spring of 2011 and will be completed by Winter 2012.

The overall goal of this project is to improve water quality within the watershed and continue to keep the Swan River meeting state water quality standards. Success of this project will be measured by load reduction calculations and water quality data that is collected by the lake associations.
